EXPERIENCE

Electrical Helper January 2008 – August 2020
Phoenix, Arizona

As an electrical helper I was helping with installing fans, lights, Tv's, switches and outlets. I helped my dad with his side jobs and did whatever I could to help. All throughout my life I went to work with him on the weekends and I was the one standing on the ladder installing while he would tell me what to do. I understand how to take power from another source and add it where it's needed.

Survey Drafter, Superior Surveying Services August 2020 – Present
Phoenix, Arizona

On Carlson a sister program to AutoCAD I learned how to work quickly in tracing survey blueprints. I understand how boundary lines work along with setback within a property. I know how to read as-builts and any documents that discuss the premises of the property. I understand how encroachments work within the property. I know how to work with contours and the different topography within the property. I understand Section Township and Range in different Counties within Arizona.
